

## FREEDOM OF INFORMATION REQUEST

**Request Number:** F-2011-04263

**Keyword:** Road Policing

**Subject:** Northern Ireland Safety Camera Scheme

### Request and Answer:

#### Question 1

I would like to request a breakdown of information from each of the cameras used in Northern Ireland - including red light cameras, speed enforcement cameras, fixed cameras and mobile cameras.

Please group the cameras under each camera type and list each camera by location.

#### Question 2

For each camera please tell me the number of detections at each site. I would appreciate this information for the last five years if this is possible within the FOI cost limit. If not, please provide as many years as possible within the cost limit - starting with the most recent year.

#### Question 3

Again for each camera site, please tell me the number of KSI collisions in the past year and also the average recorded speed - and also what these figures were at each camera site when they were first set up.

#### Question 4

Please also list all of the other speed enforcement devices (laser, radar, vascar and calibrated speedometers) and the total detections each of these have made over the last five years - or as many years as possible (starting with most recent) to come within the cost limit.

### Answer

Section 17(5) of the Freedom of Information Act 2000 requires the Police Service of Northern Ireland, when refusing to provide such information (because the cost of compliance exceeds the appropriate limit) to provide you the applicant with a notice which states that fact.

It is estimated that the cost of complying with your request for information would exceed the "appropriate costs limit" under Section 12(1) of the Freedom of Information Act 2000, which is currently set by the Secretary of State at £450.

In an attempt to retrieve the information to respond to your request I contacted PSNI Central Statistics Branch who holds the information centrally. However, to retrieve the information for

collision figures alone would take an estimated total of 43 hours. At present these statistics are only compiled up to 31 March 2010 for specific NI Road Safety Partnership (NIRSP) locations and work on compiling the 2010/11 collision figures is ongoing. PSNI hold a database of Injury Road Traffic Collisions up to 2010/11, however the database of collisions specifically at NIRSP locations has not been created yet for 2010/11. It is Central Statistics Branch aim to provide the information on the PSNI internet site for this and previous years. However, the creation of this database involves three steps: 1. extracting all the collisions that fall under the geographical boundaries of the sites and routes using a Geographical Information System which takes around 6 hours. 2. These collisions then need to be checked off a secondary source as collisions even slightly mis-plotted will not be included. The time taken to do this varies greatly depending on complexity and length of site and there are 80+ locations covered by the NIRSP, the longest of which is 52km. Using an estimate of 20 minutes per site this equates to approximately 26 hours. 3. The data for the finalised list of collisions needs to be extracted from the full Northern Ireland database and further quality checks and processing are required to create the NIRSPS database which takes at least 8 hours. The actual enquiry would require additional time and it alone is estimated to take 3 hours. To further provide a response for question 3 regarding the average speed it is estimated to take 4 hours as quality assurance checks need to be run on the detected speed in the database for completeness and accuracy. The average speed by which drivers are exceeding the limit at each site then has to be calculated for the given time periods and a table extracted. It is therefore estimated that the total time required locating and extracting all the information requested would take an estimated 64 hours and 45 minutes.

In accordance with the Freedom of Information Act 2000, this letter should be considered as a Refusal Notice, and the request has therefore been closed.

You may wish to submit a refined request in order that the cost of complying with your request may be facilitated within the 'appropriate limit'. In compliance with Section 16 of the Act, I have considered how your request may be refined to bring it under the appropriate limit. It may be possible to provide the average speed detections from 1<sup>st</sup> June 2010 onwards for each camera site where KSI collisions occurred.

Submission of a refined request would be treated as a new request, and considered in accordance with the Freedom of Information Act 2000, including consideration of relevant Part II exemptions.

Although excess cost removes the PSNI's obligations under the Freedom of Information Act, I have provided below the information which was retrieved before it was realised that the fees limit would be exceeded. I trust this is helpful but it does not affect our legal right to rely on the fees regulations for the remainder of your request.

I have attached at the end of this correspondence statistics of collisions at Northern Ireland Road Safety Partnership Mobile and Fixed Camera Sites 2005/06 to 2009/10, collisions at Red Light Running Sites, 1st April 2005 to 31st March 2010 and detections at Northern Ireland Road Safety Partnership Sites 2006/07 to 2010/11.

The Northern Ireland Road Safety Partnership was launched in July 2003, details and collision figures for Phase 1 sites before and after this date can be accessed using the following links:

[http://www.psni.police.uk/3\\_yr\\_evaluation\\_pt\\_1.pdf](http://www.psni.police.uk/3_yr_evaluation_pt_1.pdf)

[http://www.psni.police.uk/3yr\\_evaluation\\_pt2.pdf](http://www.psni.police.uk/3yr_evaluation_pt2.pdf)

[http://www.psni.police.uk/3yr\\_evaluation\\_pt3.pdf](http://www.psni.police.uk/3yr_evaluation_pt3.pdf)

[http://www.psni.police.uk/3yr\\_evaluation\\_pt4.pdf](http://www.psni.police.uk/3yr_evaluation_pt4.pdf)

PSNI do not hold the information for the break down of separate enforcement devices and detections. However the statistics for the total number of detections for the 5 years requested are as follows: 2006/2007 total =12276, 2007/2008 total =13544, 2008/2009 total =10489, 2009/2010 total =11500 and 2010/2011 total =13390.

If you have any queries regarding your request or this decision please do not hesitate to contact me on 028 9070 0164. When contacting the Freedom of Information Team, please quote the reference number listed at the beginning of this letter.

If you are dissatisfied in any way with the handling of your request, you have the right to request a review. You should do this as soon as possible, or in any case within two months of the date of issue of this letter. In the event that you require a review to be undertaken, you can do so by writing to the Head of Freedom of Information, PSNI Headquarters, 65 Knock Road, Belfast, BT5 6LE or by emailing [foi@psni.pnn.police.uk](mailto:foi@psni.pnn.police.uk).

If following an internal review, carried out by an independent decision maker, you were to remain dissatisfied in any way with the handling of the request you may make a complaint, under Section 50 of the Freedom of Information Act, to the Information Commissioner's Office and ask that they investigate whether the PSNI has complied with the terms of the Freedom of Information Act. You can write to the Information Commissioner at Information Commissioner's Office, Wycliffe House, Water Lane, Wilmslow, Cheshire, SK9 5AF. In most circumstances the Information Commissioner will not investigate a complaint unless an internal review procedure has been carried out, however the Commissioner has the option to investigate the matter at his discretion.

Please be advised that PSNI replies under Freedom of Information may be released into the public domain via our website @ [www.psni.police.uk](http://www.psni.police.uk)

Personal details in respect of your request have, where applicable, been removed to protect confidentiality.

## **Collisions at Northern Ireland Road Safety Partnership Mobile and Fixed Camera Sites 2005/06 to 2009/10**

Some sites and routes overlap therefore these figures do not add up to the total number of collisions at sites and routes.
