Keeping People Safe

Protect yourself

Protect your property.

Here are a few simple steps you can take to protect your property.

Don't leave your phone sitting on a table in a bar or restaurant - Someone may distract you with one hand and lift your phone with the other.

Never leave your phone unattended or allow anyone else to use it.

Report lost or stolen mobiles immediately to the service provider or ring 08701 123 123 – You may be liable for the cost of any calls that have been made until the time of the report.

Property mark your mobile - Use a UV pen or forensic marking kit. Mark your items with your postcode and house number to help police identify it.

Register your items for free at www.immobilise.com and improve your chances of getting them back if they are lost or stolen.

Consider installing and enabling a free Security Application (App).

Register the phone's unique IMEI number with the mobile phone company. The 15-digit IMEI number can be found underneath the battery or by dialling *#06#.

Set up a password or enable the PIN security feature of your mobile phone. To create a PIN access the phone's security feature (or ask your service provider for advice).

Lock your phone to your SIM card – This security feature minimises the possibility of your phone being used with another SIM card.
