# Incidents and Crimes with a Hate Motivation Recorded by the Police in Northern Ireland: Quarterly Update to 31 March 2013

(Providing final figures for 1<sup>st</sup> April 2012 to 31<sup>st</sup> March 2013)

**Published 9 May 2013**

## Incidents and crimes recorded by the police in Northern Ireland with a racist, homophobic, sectarian, faith/religion, disability or transphobic motivation: Quarterly update to 31 March 2013 (final figures for 2012/13)

Published 9 May 2013

This quarterly bulletin presents finalised statistics relating to incidents and crimes with a racist, homophobic, sectarian, faith/religion, disability or transphobic motivation recorded by the police for the financial year 2012/13, which runs from 1<sup>st</sup> April 2012 to 31<sup>st</sup> March 2013. A range of more detailed tables are available in the [spreadsheet](#) which accompanies this bulletin. Further information on the contents of these tables can be found in the NOTES page at the end of the bulletin.

A more comprehensive publication covering trends in hate motivated incidents and crimes from 2004/05 to 2012/13 will be available in early July 2013. The next quarterly update covering the latest 12 months to 30<sup>th</sup> June 2013 will be published on 29<sup>th</sup> August 2013.

### MAIN POINTS

- Compared with the previous year there were increases across all of the six hate incident types recorded in 2012/13. Within these hate incidents, the number of crimes with a hate motivation in 2012/13 also increased within each of the six hate crime types (see Table 1).
- Between 2011/12 and 2012/13, the detection rate has fallen for sectarian, faith/religion and disability crimes, whilst it has increased for racist and homophobic crimes. There were no transphobic crimes detected in either 2011/12 or 2012/13.

**Table 1 Overall Summary of Hate Motivated Incidents, Crimes and Sanction Detections, 2011/12 and 2012/13**

Motivation	Numbers and percentages										
	Total number of incidents recorded			Total number of crimes recorded			Total number of Sanction Detections		Sanction Detection Rate (%)

Transphobic	4	15	11	3	6	3	0	0	0.0	0.0	0.0

## Incidents and crimes with a racist, homophobic or sectarian motivation

### MAIN POINTS

#### Incidents and crimes with racist motivation

- Racist incidents have shown a general downward trend since 2009/10, but the latest figure of 750 racist incidents in 2012/13, shows an increase of 7.8 per cent on the 2011/12 figure of 696. Incidents were higher in each quarter of 2012/13 compared with the same quarters in 2011/12, with the exception of quarter 1 which was lower.
- Racist crimes have shown a similar pattern to incidents, although the downwards trend can be seen from 2006/07 onwards. The 2012/13 figure of 470 racist crimes is 2.6 per cent higher than the 2011/12 figure of 458. Crimes were higher in each quarter of 2012/13 compared with the same quarters in 2011/12, with the exception of quarter 1 which was lower.
- The sanction detection rate for crimes with a racist motivation is the highest since the beginning of the data series in 2004/05. The latest figure of 18.1% for 2012/13 is 1.3 percentage points higher than the 2011/12 figure of 16.8%.

**Figure 1 Racist incidents and crimes: quarterly totals over the two years to March 2013**

#### Incidents and crimes with homophobic motivation

- Homophobic incidents have increased by 23.0 per cent over the last year from 200 in 2011/12 to 246 in 2012/13, continuing the general upwards trend seen since 2006/07. The 2012/13 incidents figure is the highest since the data series began in 2004/05.
- Whilst homophobic incidents have shown a general upward trend since 2006/07, homophobic crimes have tended to fluctuate. At 149, the number of homophobic crimes for 2012/13 has also increased from the 2011/12 figure of 120.
- The sanction detection rate for crimes with a homophobic motivation for 2012/13 is 16.8%, an increase of 1.8 percentage points the 2011/12 figure of 15.0%.

**Figure 2 Homophobic incidents and crimes: quarterly totals over the two years to March 2013**

#### Incidents and crimes with sectarian motivation

- Sectarian incidents have followed a downwards trend since the data series was first compiled in 2005/06, although the 2012/13 figure of 1,372 shows a slight increase of 28 incidents on the 2011/12 figure.
- Sectarian crimes have shown a very similar trend to incidents, albeit at a lower level. The 889 sectarian crimes in 2012/13 is 4 crimes higher than the 885 recorded in 2011/12 (the lowest number recorded since the data series started in 2005/06).
- Sectarian incidents and crimes were lower in Q1 and Q2 2012/13 when compared to the same quarters of 2011/12. However, there was a marked increase when comparing Q3 and Q4 of each year. Most of the increase came in December which may be linked to unrest during this period.
- The sanction detection rate for crimes with a sectarian motivation for 2012/13 is 16.3%, similar to the 2011/12 rate of 16.8%.

**Figure 3 Sectarian incidents and crimes: quarterly totals over the two years to March 2013**

**Table 4: Attacks on symbolic premises, 2012/13 compared with 2011/12**

Attacks on symbolic premises are recorded where a crime has a sectarian motivation, where the premises is the intended target of the attack, and where the premises are one of the following; a church or chapel, a GAA or Ancient Order of Hibernians Hall, an Orange Hall or Apprentice Boys Hall, or a school. These figures are a subset of sectarian motivated crimes.

Type of symbolic premises	Numbers	
	2011/12	2012/13
Church or Chapel	12	14
GAA or Ancient Order of Hibernians Hall	8	*
Orange or Apprentice Boys Hall	32	27
School	4	*

\* Cell suppression has been applied to ensure that the identity of individuals/organisations or any private information relating to them is not revealed.

<sup>1</sup> Incidents and crimes are geographically recorded by the police based on the location in which the incident occurred.

<sup>2</sup> The detection figures are based on sanction detections only. The reason for focusing on sanction detections instead of the overall detection rate is that there have been a number of changes to the rules governing what can be counted as a detection since 1998/99. However sanction detections remained unaffected by these changes and so provide the most comparable data series. An explanation of the changes to the recording of detections, along with details on what constitutes a sanction detection, can be found in the User Guide to Police Recorded Crime Statistics in Northern Ireland. Offences detected in any particular year may have been initially recorded in an earlier year and for this reason some percentages may exceed 100. The sanction detection rate is the number of crimes that are cleared up by a sanction detection expressed as a percentage of the total number of recorded offences.

<sup>3</sup> This % point change is calculated on unrounded detection rate figures.

<sup>1</sup> Incidents and crimes are geographically recorded by the police based on the location in which the incident occurred.

<sup>2</sup> The detection figures are based on sanction detections only. The reason for focusing on sanction detections instead of the overall detection rate is that there have been a number of changes to the rules governing what can be counted as a detection since 1998/99. However sanction detections remained unaffected by these changes and so provide the most comparable data series. An explanation of the changes to the recording of detections, along with details on what constitutes a sanction detection, can be found in the User Guide to Police Recorded Crime Statistics in Northern Ireland. Offences detected in any particular year may have been initially recorded in an earlier year and for this reason some percentages may exceed 100. The sanction detection rate is the number of crimes that are cleared up by a sanction detection expressed as a percentage of the total number of recorded offences.

<sup>3</sup> This % point change is calculated on unrounded detection rate figures.

## Incidents and crimes with a faith/religion, disability or transphobic motivation

### MAIN POINTS

- Increasingly rigorous data checks have been carried out on the application of faith/religion, disability and transphobic motivated incidents and crimes in recent years to ensure that the definitions are being clearly adhered to. These improvements will have had an impact in reducing the levels of these incidents recorded. Whilst the 2011/12 levels were at their lowest since each data series were compiled, 2012/13 has seen increases recorded against all 3 of these motivation types.
- In 2012/13, there were 22 faith/religion motivated incidents recorded, five in South Belfast, four in Castlereagh, three in North Belfast, two each in East Belfast and North Down, and one each in Ards, Dungannon & South Tyrone, Magherafelt, Strabane, Foyle and Ballymena. Over the same time period there were 14 faith/religion crimes (three in South Belfast, two each in Ards and Castlereagh and one each in North Belfast, East Belfast, Dungannon & South Tyrone, Magherafelt, Strabane, Foyle and Ballymena) and two sanction detections (one in South Belfast and one in Carrickfergus).
- Disability motivated incidents and crimes more than doubled between 2011/12 and 2012/13 (incidents rose from 33 to 74, while crimes rose from 15 to 35). The number of disability motivated incidents and crimes by policing district and area is provided in Table 10 of this bulletin. The most notable increase occurred in D District where incidents rose from 2 to 18 and crimes rose from 1 to 10.
- Of the 15 transphobic motivated incidents recorded in 2012/13, seven were in South Belfast, three were in North Belfast, two were in Dungannon & South Tyrone, and there was one each in Carrickfergus, Craigavon and West Belfast. Six transphobic crimes were recorded – two each in South Belfast and North Belfast, and one each in Dungannon & South Tyrone and West Belfast. There were no transphobic detections recorded in 2012/13.

**Table 8: Incidents with a faith/religion, disability or transphobic motivation recorded, 2012/13 compared with 2011/12**

	Numbers					
	Faith/religion incidents		Disability incidents		Transphobic incidents	
	2011/12	2012/13	2011/12	2012/13	2011/12	2012/13
Incidents	8	22	33	74	4	15

<sup>1</sup> Incidents and crimes are geographically recorded by the police based on the location in which the incident occurred.

<sup>2</sup> The detection figures are based on sanction detections only. The reason for focusing on sanction detections instead of the overall detection rate is that there have been a number of changes to the rules governing what can be counted as a detection since 1998/99. However sanction detections remained unaffected by these changes and so provide the most comparable data series. An explanation of the changes to the recording of detections, along with details on what constitutes a sanction detection, can be found in the User Guide to Police Recorded Crime Statistics in Northern Ireland. Offences detected in any particular year may have been initially recorded in an earlier year and for this reason some percentages may exceed 100. The sanction detection rate is the number of crimes that are cleared up by a sanction detection expressed as a percentage of the total number of recorded offences.

<sup>3</sup> This % point change is calculated on unrounded detection rate figures.

## NOTES

Unlike the Northern Ireland Crime Survey (NICS), police recorded crime figures do not include crimes that have not been reported to the police or those that the police decide not to record, but they do cover crimes against those aged under 16, organisations such as businesses, and crimes 'against the state' i.e. with no immediate victim (e.g. possession of drugs).

Like any administrative data, police recorded crime statistics are affected by the rules governing the recording of data, systems in place and operational decisions in respect of the allocation of resources. More proactive policing in a given area could lead to an increase in crimes recorded without any real change in underlying crime trends. These issues need to be taken into account when using these data.

### Time periods covered

The figures in this bulletin are presented on a financial year basis and, in this context:

- Quarter 1 refers to the months April, May and June
- Quarter 2 refers to the months July, August and September
- Quarter 3 refers to the months October, November and December
- Quarter 4 refers to the months January, February and March

### Data accuracy

While crimes included within the police recorded crime statistics for Northern Ireland are individually checked for compliance with the Home Office Counting Rules by the PSNI's Statistics Branch, the identification of a hate motivation is derived from a motivation 'tick box' on the system used by PSNI to record crime. The motivation is identified and completed by a police officer or member of police staff for each such reported incident or crime. The correct application of a hate motivation for all such incidents/crimes is not quality assured by the PSNI's Statistics Branch, but audits and data quality checks are routinely conducted in an attempt to ensure that any under or over-recording is corrected.

### Additional data

This bulletin shows a Northern Ireland level summary of hate motivated incidents and crimes recorded by the police for the 2012/13 financial year. Additional figures to accompany this bulletin are published in a spreadsheet: [http://www.psni.police.uk/quarterly\\_hate\\_motivations\\_update\\_apr-mar\\_12\\_13.xls](http://www.psni.police.uk/quarterly_hate_motivations_update_apr-mar_12_13.xls). This spreadsheet provides summary figures for each hate motivation. It also contains a pivot table providing statistics on incidents, crimes, sanction detections (numbers) and sanction detection rates (%) for racist, homophobic and sectarian motivations. Each of these data measures is available:

- at Northern Ireland level as well as for each policing district and policing area;
- for a range of crime types; and
- for a range of time periods (latest and previous financial years and each of the last 8 quarters).

The pivot table allows the user to manipulate the data, select the data they are most interested in and carry out calculations on the data. The data records displayed in the pivot table are also available in this spreadsheet.

### Further information

Annual figures on hate motivated incidents and crimes from 2004/05 to 2011/12 are available in the publication Trends in Hate Motivated Incidents and Crimes Recorded by the Police in Northern Ireland 2004/05 to 2010/11, available at:

[http://www.psni.police.uk/hate\\_motivated\\_incidents\\_and\\_crimes\\_in\\_northern\\_ireland\\_2004-05\\_to\\_2011-12.pdf](http://www.psni.police.uk/hate_motivated_incidents_and_crimes_in_northern_ireland_2004-05_to_2011-12.pdf)

An updated publication covering trends from 2004/05 to 2012/13 will be available in early July 2013.

Further details on Police Recorded Crime statistics, including those with a hate motivation, are available in the [User Guide to Police Recorded Crime Statistics in Northern Ireland](#). This is a reference guide with explanatory notes regarding the issues and classifications which are key to the production and presentation of police recorded crime statistics. The [hate motivation definitions](#) upon which these statistics are based are also available in this user guide and on the PSNI Internet site.

Copies of other PSNI publications are available from the PSNI Internet site: [http://www.psni.police.uk/index/updates/updates\\_statistics.htm](http://www.psni.police.uk/index/updates/updates_statistics.htm)
