## Section 1

### Introduction

The Police Service of Northern Ireland (PSNI) collate statistics on motoring offences in Northern Ireland, they include all disposals available to the police. The range of disposals covered includes those offences dealt with by means of a fixed penalty notice (FPN), discretionary disposal, speed awareness course and referral for prosecution.

Police led traffic prosecutions occur when the offence is of a serious nature and has no corresponding Fixed Penalty or where multiple offences have occurred or where the alleged offender wishes to have the matter(s) heard at court. Where an offending driver has already accumulated a number of penalty points, to the extent that a driving disqualification is now in scope, such cases must be heard at court and will consequently also be subject of a prosecution.

FPNs originated as an administrative way to deal with simple parking offences without referring such matters to the courts. The scheme was then expanded to cover minor road traffic offences in the mid-1980s and was again further expanded to incorporate Endorsable and Non Endorsable offences with the introduction of penalty points in October 1997.

Non Endorsable offences are those which don't result in penalty points on your licence and which incur a fine of £30. The standard fine for Endorsable offences is £60 along with three penalty points. More serious offences such as driving without insurance can incur fines of up to £200 and six points. Fine collection and revenue reporting are managed by NI Court Service.

A driver may be issued with a maximum of one Endorsable Fixed Penalty Notice plus two Non-Endorsable Fixed Penalty Notices relating to the same incident.

Speed awareness courses were introduced in Northern Ireland in 2010. Drivers, depending on the speed at which they were detected, may be offered an opportunity to attend a Speed Awareness Course as an alternative to penalty points. The course which is available at eight locations throughout Northern Ireland and delivered and managed by an appointed contractor must be attended within a period of 120 days from the date of detection. Certain restrictions apply to who can qualify for the speed awareness course option.

Discretionary disposals were introduced in 2011 to provide a speedy, effective outcome tailored to the needs of the victim. In addition they challenge offenders to recognise the impact of their behaviour. They can be used as an alternative method of disposal for dealing with motoring offences. Discretionary disposals were renamed as Community Resolution Notices (CRN) as of 30th June 2016. They follow the same basic principles as discretionary disposals but differ insofar as they should not be routinely issued for motoring offences.

A list of fixed penalty offences is available at the end of this document and can also be found on PSNI website and can be accessed via following link – [List of FPNs](#)

Drivers who were detected for speeding or running a red light through the NI Road Safety Partnership (RSP) are excluded from these statistics as the motoring offence report focuses only on Police Officer issued tickets. The NI RSP involves the cooperation of a number of government departments/agencies and the PSNI. The partnership has responsibility for 4

## NOT PROTECTIVELY MARKED

fixed speed cameras, 1 average speed camera and 6 red light running cameras. In addition there are 8 camera vans operated by civilians (they are not staffed by police officers or police personnel). More information and figures relating to those detected through the Partnership can be accessed via following link – [NI RSP Website](#)

The number of FPNs being issued has fluctuated over recent years and can be explained by the following -

1. Parking offences are no longer enforced by PSNI from 29<sup>th</sup> Oct 2006 as the Traffic Management (NI) Order 2005 came into effect on 30th October 2006. The effect of this legislation was to decriminalise the vast majority of parking and waiting offences in Northern Ireland. Responsibility for enforcement of parking/waiting restrictions is carried out by Traffic Attendants and is the responsibility of DRD Road Services. National Car Parks Limited provides this service on behalf of DRD Road Services.
2. Speed awareness course introduced in June 2010 as an alternative method of disposal for low level offenders instead of receiving a FPN for speeding offences.
3. Discretionary Disposals introduced during 2011 as another alternative method of disposal instead of receiving a FPN for traffic offences.

## Section 2

### Data Sources and Collection Methods

As per the [PSNI Statement of Administrative Sources](#) included in the Statistics section of the PSNI website, information on Motoring Offences are collected using the organisations own administrative and management sources. The main IT system involved in the collation of the FPNs was the Vehicle Procedures / Fixed Penalty Office (VP/FPO) system. This operational system provides an administrative dataset that is analysed and reported on by the PSNI's Statistics Branch. This has now been replaced in December 2016 and FPNs are now extracted from the Star Dome system. Discretionary disposals issued and those offences referred for prosecution are extracted from the NICHE Information Management system. The data for drivers who completed a speed awareness course is extracted from the Star Dome system.

Much of the data collation for FPNs is still reliant on paper tickets being completed by police officers and then forwarded to the Fixed Penalty Processing Centre (FPPC) for input onto police systems. However, increasing use is being made of technology which will allow police officers to record the information at the scene meaning that the information is then transferred directly to PSNI systems.

As with all administrative systems, statistics are a by-product of the process and are heavily reliant on the information being entered correctly by staff across PSNI. To address this risk, Statistics Branch has developed a wide range of quality assurance measures and data validation checks to ensure that the statistics are as accurate and meaningful as possible within the given resource and time constraints. These processes are outlined in more detail below.

### Validation Process / Quality Assurance

Quality assurance checks have been developed to ensure that the statistics we produce are of high quality, accurate and meaningful. Our internal quality assurance and validation procedures are regularly tested, reviewed and updated.

Data quality checks are conducted regularly throughout the year to identify and correct inconsistencies within the data. Examples of the data quality checks are –

- All essential fields are populated to ensure monthly reports can be published
- Ensuring a speed is recorded against all Endorsable speeding offences
- Checks to ensure appropriate speed is input against the speed limit
- Checks to ensure offender age is appropriate for the FPN that has been issued
- Check for missing FPNs
- Check for inconsistency with date of offence and date input onto the system
- Checks to ensure there are no duplicates on the system

## Strengths and Limitations of the data

### Strengths

Police recorded statistics relating to motoring offences in Northern Ireland are the main source of official information in trends and statistics relating to disposals issued for motoring offences. Fixed Penalties originated as an administrative way to deal with simple parking offences without referring such matters to the courts. Such was its success that it was identified as an efficient way to deal with minor road traffic offences and was expanded to encompass these matters in the mid-1980s. With the introduction of penalty points for traffic offences, the scheme was expanded to incorporate Endorsable and Non-Endorsable offences. Discretionary Disposals introduced during 2011 as another alternative method of disposal instead of receiving a FPN for traffic offences.

### Limitations

As the motoring offence figures relate to those traffic offences that took place within Northern Ireland, they do not include any traffic offences that may have happened either in the Republic of Ireland or in Great Britain.

There are a range of other disposals available to the police with regards to motoring offences such as completion of a Driver Awareness Course and prosecution. Statistics on these sources are currently being developed and assessed for inclusion in this report to give a more inclusive and rounded picture of how the PSNI are dealing with Motoring Offences in Northern Ireland.

These figures remain separate to those of the NI Road Safety Partnership which operates as an independent cross departmental body for Road Safety. This can cause confusion for users but information is provided in the report on how to access the most recent NI RSP data.

## Confidentiality

The PSNI's Statistics Branch complies with the requirements of the Code of Practice for Official Statistics in relation to Principle 5: Confidentiality. A [Confidentiality Protection Arrangements](#) document is available on the statistics section of the PSNI website. It outlines the arrangements for maintaining confidentiality of statistical data and covers:

- Physical Security
- Technical Security
- Staff Training
- Statistical Disclosure Control
- Sharing of data with a third party

Disclosure control may have been applied to some tables in line with the requirements of the Code of Practice for Official Statistics. Where this applies cells have been merged or suppressed in order to ensure that the identity of individuals or any private information relating to them is not revealed.

## Comparability within UK and ROI

Promoting comparability is an important requirement of the Code of Practice for Official Statistics which aids interpretation for the users of the fixed penalty notice statistics. Listed below are useful comparative sources of fixed penalty statistics for traffic offences.

An Garda Síochána - Republic of Ireland

<http://www.garda.ie/Controller.aspx?Page=10748&Lang=1>

England and Wales

<https://www.gov.uk/government/collections/police-powers-and-procedures-england-and-wales>

Information about the process of issuing fixed penalty notices for motoring offences in England and Wales, including the penalty levels, are shown in the guidance issued by the Crown Prosecution Service

[http://www.cps.gov.uk/legal/p\\_to\\_r/road\\_traffic\\_offences\\_guidance\\_on\\_fixed\\_penalty\\_notices/](http://www.cps.gov.uk/legal/p_to_r/road_traffic_offences_guidance_on_fixed_penalty_notices/)

Scotland stopped collecting information on police fixed penalties for traffic offences in 2009/10, the last data published can be found at the address below

<http://www.scotland.gov.uk/Topics/Statistics/Browse/Crime-Justice/Datasets/MV0910>

## Section 3

### Definitions

#### **Non-Endorsable Fixed Penalties**

Police officers in uniform currently issue Non-Endorsable Fixed Penalties. There are over 130 offences associated with a non-Endorsable notice ranging from lighting offences to incorrect form of registration marking.

They carry a fine of £30 and there are no points endorsed on your driving licence.

The Traffic Management (NI) Order 2005 came into effect on 30th October 2006. The effect of this legislation was to decriminalise the vast majority of parking and waiting offences in Northern Ireland. Responsibility for enforcement of parking/waiting restrictions has transferred to the Department for Regional Development and is now carried out by Traffic Attendants employed by them. National Car Parks Limited provides this service on behalf of DRD Road Services.

#### **Endorsable Fixed Penalties**

Police officers (in uniform) are able to issue Endorsable Fixed Penalty Notices (EFPNs) for a variety of road traffic offences. The offences range from stopping on a motorway to defective tyres. However, the most common ones are excess speed, using a handheld mobile phone and driver failing to wear a seatbelt. Endorsable Fixed Penalty Notices differ from non-Endorsable fixed penalty notices. They involve the endorsement of penalty points on a driving licence and they carry a heavier fine which is currently £60. Penalty Points remain on your licence for a period of 3 years.

The offence of 'Driving or causing or permitting a person to drive a motor vehicle whilst uninsured' may also be dealt with by the issue of an Endorsable Fixed Penalty Notice. The penalty for this offence is a fine of £200 and six penalty points. Your vehicle will also be seized pending the production of valid insurance and any other required driving documents.

#### **Discretionary Disposal**

Discretionary disposals were introduced by the PSNI to provide a speedy, effective outcome tailored to the needs of the victim. In addition they challenge offenders to recognise the impact of their behaviour. They can be used for a specified list of low level offences and are dealt with in this way rather than reporting the case to the Public Prosecution Service. In addition, the offender must have admitted to the offence before a discretionary disposal can be considered. They were renamed as Community Resolution Notices as of 30<sup>th</sup> June 2016 and are no longer routinely issued for traffic offences.

#### **Speed Awareness Courses**

Drivers, depending on the speed at which they were detected, may be offered an opportunity to attend a Speed Awareness Course as an alternative to penalty points. The course which is available at nine locations throughout Northern Ireland and delivered and managed by an appointed contractor must be attended within a period of 120 days from the date of detection. This method of disposal was introduced in June 2010. Certain restrictions apply to who can qualify for the speed awareness course option.

## Section 4

### Publication Process and Methods

Motoring Offence statistics for Northern Ireland are published on the Police Service of Northern Ireland website under the Statistics section -

<https://www.psnl.police.uk/globalassets/inside-the-psni/our-statistics/motoring-offences-statistics>

Within a given calendar year, in-year these statistics are updated on a monthly basis until the end of the year when more detailed validations take place, as per the publication schedule, these in-year statistical updates are provisional and subject to amendment.

The final figures for the reporting period are published in late March each year with the publication date pre-announced in line with the PSNI's publication scheme.

### Publication Schedule

In line with National Statistics guidelines our publication dates are pre-announced and are available on our website under [Publication Schedule](#).

## Section 5

### User Consultation

User consultation is an important aspect of our work. It informs our work schedules and statistical planning process. Our [User Engagement Strategy](#) is available on our website and highlights our aims and standards for dealing with key users and requests from members of the public.
