Police Recorded Crime in Northern Ireland: Monthly Update to 31 August 2015

Published 24 September 2015

Police Recorded Crime in Northern Ireland: Monthly Update to 31 August 2015

Published 24 September 2015

This monthly bulletin presents the most recent police recorded crime statistics, relating to crimes recorded by the police to 31st August 2015. Figures were compiled on the 21st September 2015, using data extracted from the police administrative system on that date. Figures dating back to 1st April 2015 are provisional and will be subject to change until the finalised 2015/16 data are published in May 2016.

Assessment of police recorded crime in Northern Ireland

In January 2014 the UK Statistics Authority cancelled the designation of police recorded crime statistics in England & Wales in January 2014 because of concerns regarding the quality and integrity of police recorded crime in England & Wales; the lack of assurance of the data integrity in Scotland resulted in the designation of these statistics being cancelled in July 2014.

As a result of these concerns, the Authority commenced an assessment of police recorded crime in Northern Ireland in June 2014. In addition to this assessment, Her Majesty's Inspectorate of Constabulary (HMIC) were invited to conduct a crime data integrity audit within PSNI during September 2014 similar to those they conducted in England & Wales during 2014. The outcome of the audit was published on 19th March 2015 in the report [Crime data integrity – inspection of the Police Service of Northern Ireland](#). The main findings in relation to data quality were:

- a crime recording accuracy rate of 97 per cent with a confidence interval of +/-2 per cent;
- 98 per cent of crimes correctly classified; and
- 84 per cent recorded within the 72-hour limit allowed under the Home Office Counting Rules.

The UK Statistics Authority assessment was concluded after the publication of the HMIC report; the Authority's [assessment report Number 301 Statistics on Police Recorded Crime in Northern Ireland \(Police Service of Northern Ireland\)](#) was published on 28th May. This report judged that the police recorded crime statistics in Northern Ireland can be designated as National Statistics (subject to implementing two requirements and reporting on these to the Authority by December 2015).

Introduction of Action Fraud within Northern Ireland: From 1st April 2015 Action Fraud has taken responsibility for the central recording of fraud offences previously recorded by PSNI; Action Fraud became responsible for all such reports in England & Wales by 1st April 2014. Action Fraud is the UK's National Reporting Centre for fraud and internet crime reported directly to them from the public and other organisations. While this means that these fraud offences are no longer recorded by PSNI, Action Fraud figures relating to victims residing in Northern Ireland will be provided to PSNI on a monthly basis. As a result, this bulletin will contain a section on 'other fraud' which will present combined PSNI and Action Fraud figures covering the last two years. All other sections within the bulletin will present figures on a comparable basis that exclude 'other fraud'.

Change to policing boundaries as a result of implementing the Review of Public Administration: As part of the Review of Public Administration which came into effect on 1st April 2015, PSNI has moved from eight to eleven policing districts. The geographic breakdown presented in this bulletin and in the accompanying excel spreadsheets is presented on the basis of these new boundaries. As it will take up to six months to have the new policing model fully in place, the figures presented here are a best approximation to the new boundaries and may be revised later in the year.

OVERALL CRIME TRENDS (excluding fraud)

- Crime has shown a downwards trend over the last ten years, from a peak of 138,132 in 2002/03 to 98,558 recorded in 2012/13, the lowest level recorded since 1998/99 (the first year for which comparable crime data is available). The level of 104,660 recorded during the twelve months to 31st August 2015 shows an increase of 1484 (1.4 per cent) on the 2014/15 figure of 103,176.
- Crime increased by 2.6 per cent (2,667 offences) in the twelve months to August 2015 when compared with the previous twelve months. The majority of this increase occurred in the categories of violence without injury, criminal damage, possession of drugs, all other theft offences and sexual offences (rape and other sexual offences combined). A full breakdown by crime category is available in Table 2.
- At 9,434 the level of crime recorded in August 2015 was 6.8 per cent (597 offences) higher than the level recorded in August 2014.

Figure 1 Total number of crimes each month from April 2010 to August 2015 (excluding fraud)

COMPARISON OF CURRENT AND PREVIOUS 12 MONTHS, excluding fraud (September 2013 to August 2014 with September 2014 to August 2015)

- Overall crime increased by 2.6 per cent in the twelve months to 31st August 2015 when compared with the twelve months to 31st August 2014. The crime level showed a mainly downwards direction between October 2013 (8,909 offences) and February 2014 when 7,495 offences were recorded, the third lowest monthly figure recorded since the data series began in April 1998. The level of crime then showed an upwards trend reaching a level of 9,074 in October 2014, before decreasing each month to 7,469 in January 2015, the lowest figure recorded in the past two years and the second lowest monthly figure since the data series began in April 1998. Since then the level of recorded crime has generally increased, reaching 9,434 in August 2015 (the highest level recorded in the last two years).

Figure 2 Total number of crimes each month from September 2013 to August 2015 (excluding fraud)

- Recorded crime figures by type of crime for September 2014 to August 2015 compared with September 2013 to August 2014 are shown in Table 2. Overall crime outcomes and outcomes by type of disposal covering the same time periods are available in Tables 3 and 4. Between September 2014 and August 2015 there were five outcomes where no action was taken against the offender (indictable only offences where the offender died before proceedings or PPS did not prosecute), with four recorded between September 2013 and September 2014; these outcomes are included in the rates presented in Table 3 but are not presented as separate disposal types in Table 4.

Figure 3 Percentage change in the main recorded crime types, September 2014 to August 2015 compared with September 2013 to August 2014

- Trends over the last two years:** The main crime categories of violence against the person, sexual offences, drug offences, criminal damage and miscellaneous crimes against society have shown upwards trends over the last two years, with theft offences (excluding burglary) showing a downwards trend. The trends for robbery, burglary, public order offences and possession of weapons offences have been fairly flat.
- Violence with injury (including homicide)** has shown a slight upwards trend over the last two years; the lowest level was seen in January 2014 (1,009 offences) with the highest level recorded in August 2014 (1,372 offences). The number of crimes recorded has shown an overall increasing trend between January 2014 and August 2014 before falling to 1,087 in January 2015. The level has generally increased each month since then with 1,350 offences recorded in August 2015, the second highest in the last two years. The trend for **violence without injury** has been in an upwards direction over the last two years. Levels fluctuated between September 2013 (1,440 offences) and November 2013 (1,604 offences) followed by an overall downward trend to 1,367 recorded in February 2014 (lowest figure in last two years). The upward trend then resumed, reaching a two-year high in July 2014 with 1,908 offences recorded; the level generally decreased to 1,388 offences in January 2015 before increasing to the current level of 1,821 offences in August 2015, the fourth highest figure in the last two years.
- Sexual offences** have been showing an upwards trend over the last two years. The level followed a downwards trend from October 2013, when 210 offences were recorded before falling to the lowest level in the past two years in December 2013 (157 offences). The level then moved in a generally upwards direction until October 2014 when 274 offences were recorded, the highest in the last 24 months, before falling to 164 offences in December 2014, the second lowest figure in the last two years. The level has generally increased in most months since December 2014 with 232 offences recorded in August 2015.
- Robbery** has shown a fairly flat trend over the last two years. The number of robberies recorded increased from September 2013 when 50 offences were recorded, the second lowest monthly figure in the last two years to January 2014 when 104 offences were recorded; this was the highest level over the last 24 months. As with the previous year, the level generally decreased to July 2014 with 52 offences recorded, before increasing in each consecutive month to 102 offences recorded in December 2014. This is the highest level recorded since January 2014; the level then fell to the lowest monthly figure with 42 offences recorded in May 2015. There were 62 offences recorded in August 2015.
- Domestic burglaries:** Over the last two years domestic burglaries have shown a slight upwards trend. March 2015 and February 2015 have recorded the highest (573 offences) and second highest (546 offences) figures while the level recorded in April 2015 was the fifth highest during this time period (526 offences). The lowest level was 424 recorded in December 2014. The trend seen between March 2015 and August 2015 is similar to that seen over the same period in 2014, albeit at a slightly higher level. The

level in August 2015 stands at 474 recorded offences. **Non-domestic burglaries** have shown a slight downwards trend over the last two years with figures tending to fluctuate month to month; the highest level in the last 24 months was 315 recorded in March 2014 and the lowest level of 211 offences was recorded in January 2015. The current level for August 2015 stands at 294 recorded crimes, the third highest in the past two years.

- The classification of theft offences (excluding burglary) has shown a slight downwards trend over the last two years. Within this classification the following trends can be seen:

Theft from the person has shown a fairly flat trend; the highest level in the past 24 months was seen in October 2013 when 70 offences were recorded, while the lowest month was January 2015 when 26 offences were recorded. The level has generally risen since then with 62 offences recorded in August 2015.

Vehicle offences have shown a downwards trend over the past two years. A two-year high of 588 offences in January 2014 was followed by a level of 386 in February 2014 with a further increase to 508 offences in March 2014. Levels have generally fluctuated since then, with a two-year low of 347 offences in January 2015 and a level of 469 in August 2015.

Shoplifting offences have shown a fairly flat trend, with a peak of 659 offences in October 2013, the highest level recorded in the last two years. While this was followed by a fall to 487 offences recorded in January 2014, the increasing trend then resumed to reach 614 offences recorded in November 2014. The level fell to the two lowest figures recorded in the past two years of 439 offences in January 2015 and 450 offences in February 2015. The level has since increased over recent months to a level of 623 offences in August 2015, the second highest figure in the past two years.

Bicycle theft fell each month from September 2013 (125 offences) to 47 offences recorded in December 2013 before showing an increasing trend to September 2014 (134 offences). As with the previous year, the figure has since fallen sharply to a two-year low of 36 offences recorded in January 2015 before rising to a level of 81 offences in April 2015. The level has since generally risen since with 74 offences recorded in August 2015.

All other theft offences have shown a slight increasing trend since September 2013. There was a general downward trend until February 2014. Levels have since been generally increasing, reaching 1,201 offences recorded in October 2014 which is the highest level in the past two years. The level currently stands at 1,094 recorded in August 2015. A factor which may have contributed to the slightly higher levels recorded between August 2014 and July 2015 compared with the previous 12 months is a change in the Home Office Counting Rules, introduced in April 2014, which has resulted in more offences of making off without payment being recorded (mainly non payment of fuel at petrol stations). This change has made it more difficult for these crimes to meet the criteria which allow the offences to be no crime'd.

- **Criminal damage** offences have seen a slightly upwards trend over the last two years. There were 1,762 offences recorded in October 2013 before levels fell to 1,414 in February 2014 which was the second lowest figure in the last two years. Levels were again in an upwards direction between February 2014 and October 2014 reaching 1,844 offences recorded, the third highest level since September 2013. The number of criminal damage offences fell between October 2014 and January 2015 to the lowest level in the last two years (1,321 offences); since then the level has generally increased, reaching a two year high of 1,925 in June 2015. The current level stands at 1,842 in August 2015 which is the fourth highest figure in the past two years.
- **Outcomes where disposal administered:** The overall rate has shown a fairly flat trend, which has been reflected across most of the main crime types.

POLICING DISTRICT COMPARISON OF CURRENT AND PREVIOUS 12 MONTHS, excluding fraud (September 2013 to August 2014 with September 2014 to August 2015)

As part of the Review of Public Administration which came into effect on 1st April 2015, PSNI has moved from eight to eleven policing districts. Figure 4 below is presented on the basis of these new boundaries. As it will take up to six months to have the new policing model fully in place, the figures presented here are a best approximation to the new boundaries and may be revised later in the year.

Figure 4 Percentage change in recorded crime by policing district, September 2014 to August 2015 compared with September 2013 to August 2014 (excluding fraud)

- Belfast City has shown an increasing crime trend over the past two years. The lowest crime level was recorded in February 2014 (2,512) and this was followed by an overall increasing trend to September 2014 (fourth highest recorded at 3,146). Levels then decreased each month to 2,544 crimes in January 2015. Since then the level has generally increased, reaching 3,324 crimes in August 2015, the highest figure recorded in the last two years.
- The crime level was higher in the 12 months to August 2015 compared with the 12 months to August 2014 in all districts with the exception of Mid Ulster, Causeway Coast & Glens and Mid & East Antrim. While the levels in all Districts have fluctuated over the last two years, they have generally increased since the start of 2015.

RECORDING OF FRAUD

From 1st April 2015 Action Fraud has taken responsibility for the central recording of fraud offences previously recorded by PSNI; Action Fraud became responsible for all such reports in England & Wales by 1st April 2014. Action Fraud is the UK's National Reporting Centre for fraud and internet crime reported directly to them from the public and other organisations. While this means that these fraud offences are no longer recorded by PSNI, Action Fraud figures relating to victims residing in Northern Ireland will be provided to PSNI on a monthly basis. The table below incorporates both sets of figures to show the number of fraud offences recorded by PSNI and Action Fraud over the last two years.

Table 1 Number of fraud offences recorded in the 12 months to 31st August 2015 compared with the previous 12 months

	12 months to August'14	12 months to August'15
PSNI recorded fraud	1,988	1,065
Recorded by Action Fraud	-	963
Combined fraud figure	1,988	2,028

Table 2 Number of recorded crimes in the 12 months to 31st August 2015 compared with the previous 12 months

Offence group	Number and percentage changes			
	12 months to August 2014	12 months to August 2015 ^{1,2}	change between years	% change between years ³
VICTIM-BASED CRIME

POSSESSION OF WEAPONS OFFENCES	716	867	151	21.1
PUBLIC ORDER OFFENCES	1,521	1,388	-133	-8.7
MISCELLANEOUS CRIMES AGAINST SOCIETY	2,530	2,655	125	4.9
TOTAL RECORDED CRIME – ALL OFFENCES (excluding fraud)	101,993	104,660	2,667	2.6

¹ Figures for the 12 months to 31st August 2015 are provisional and will be subject to change.

² Individual crime types may not add to Total Recorded Crime – All Offences as there will be some crimes yet to complete the validation process and be allocated to a crime classification.

³ ‘-’ indicates that for offences recorded a percentage change is not reported because the base number of offences is less than 50.

TOTAL RECORDED CRIME – ALL OFFENCES (excluding fraud)	19.8	21.4	2.9	2.6	2.9	3.0	0.9	1.0	0.0	0.0

¹ It is possible to detect a crime with an offence which attracts a lesser penalty than the crime recorded. For example where an assault occasioning actual bodily harm has been recorded (violence with injury), the offender may be dealt with for the offence of common assault (violence without injury). Outcomes where no action was taken against the offender are not presented.

² Penalty notices for disorder were introduced in June 2012.

³ Figures for the 12 months to 31st August 2015 are provisional and will be subject to change.

NOTES

Strengths and Limitations of Police Recorded Crime Statistics and Alternative Measures of Crime

While this monthly update presents the level of crime recorded by the police, there is an alternative but complementary measure of crime, the Northern Ireland Crime Survey (NICS) which is published by the Department of Justice for Northern Ireland. Each source of crime information has different strengths and limitations but can be looked at together to provide a more comprehensive picture of crime than could be obtained from either series alone. Details around the need for both recorded crime figures and the NICS can be found in paragraphs 1.2 and 1.3 of the bulletin [Experience of Crime: Findings from the 2013/14 Northern Ireland Crime Survey](#). Both of these measures of crime inform public debate about crime and support the development and monitoring of policy.

Unlike the Northern Ireland Crime Survey, police recorded crime figures do not include crimes that have not been reported to the police or those that the police decide not to record, but they do cover crimes against those aged under 16, organisations such as businesses, and crimes 'against the state' i.e. with no immediate victim (e.g. possession of drugs). It was estimated in 2013/14 that around 46 per cent of NICS comparable crime was reported to the police in Northern Ireland although this varied for individual offence types.

Like any administrative data, police recorded crime statistics are affected by the rules governing the recording of data, systems in place and operational decisions in respect of the allocation of resources. More proactive policing in a given area could lead to an increase in crimes recorded without any real change in underlying crime trends. These issues need to be taken into account when using these data.

Variations in crime trends: crime survey data and police recorded crime figures in England & Wales and Northern Ireland

An analysis of variation in crime trends looking at comparable crime categories between the Crime Survey for England and Wales (CSEW) and the police recorded crime series for England and Wales was conducted by the Office for National Statistics and published in January 2013. Updated analysis for England and Wales was made available in the [User Guide to Crime Statistics for England and Wales](#) in July 2014. This study identified that, while both sets of figures showed crime to be falling, after 2006/07 the rate of reduction for police recorded crime was around twice the rate of the CSEW. This raised questions about the quality of the police recorded crime figures and was one of the issues that led to the UK Statistics Authority removing the National Statistics designation from the police recorded crime figures in England and Wales. In Northern Ireland the police recorded crime figures did not show the same rate of decrease as either the Northern Ireland Crime Survey (NICS) or the police recorded crime figures in England and Wales. [Please note that the NICS was not conducted in 2002/03 and so comparisons were made instead with 2003/04. In addition, while NICS figures for 2013/14 are currently available, additional analysis has yet to be conducted for this time period to identify the comparable sub-set of crimes required to update the Northern Ireland figures below]. Further details can be found on page 5 of the [Police Recorded Crime Statistics User Guide](#).

Table 5 Percentage reduction in comparable crime categories 2002/03 to 2013/14 (England and Wales)

	Percentage change 2002/03-2007/08	Percentage change 2007/08-2012/13	Percentage change 2012/13-2013/14	Percentage change 2002/03-2013/14
Police recorded crime	-20	-32	-2	-47
CSEW	-16	-19	-14	-42

Table 6 Percentage reduction in comparable crime categories 2003/04 to 2012/13 (Northern Ireland)

	Percentage change 2003/04-2006/07	Percentage change 2006/07-2011/12	Percentage change 2011/12-2012/13	Percentage change 2003/04-2012/13
Police recorded crime	-7	-20	-3	-27
NICS	-28	-28	4	-46

Data Accuracy

Figures within the current financial year to date are provisional and will be subject to slight revision until finalised figures for the full financial year are published in May 2016. Within year, crime figures are subject to a validation and quality assurance process. The overall crime figures at Northern Ireland, District and Area level cover all records identified as crimes, including those that have not yet completed the validation process. However figures for each crime type do not include records which are under process and so these figures will not add to the overall total. The percentage of crimes complete and under process is shown in Table 7 below.

Table 7 Percentage of crime records that have completed the validation process, April - August 2015

	Percentages	
	% crime records complete	% crime records under process
Year to date: April-August 2015	98.8	1.2
Latest complete month: August 2015	97.5	2.5

Data Quality and Auditing

The quality assurance processes mentioned above have been set in place to ensure that the numbers and types of crimes being recorded are, as far as is possible, recorded in compliance with the Home Office Counting Rules. Further details of the data quality checks and processes that PSNI has in place are available in section 4 of the [User Guide to Police Recorded Crime Statistics in Northern Ireland](#).

As mentioned previously in this bulletin, in light of the crime recording issues in England & Wales and Scotland, Her Majesty's Inspectorate of Constabulary (HMIC) were invited to conduct a crime data integrity audit within PSNI during September 2014, similar to those they conducted in England & Wales during 2014. The outcome of the audit was published on 19th March 2015 in the report [Crime data integrity – inspection of the Police Service of Northern Ireland](#). The main findings in relation to data quality were:

- a crime-recording accuracy rate of 97 percent with a confidence interval of +/-2 percent;
- 98 percent of crimes correctly classified; and
- 84 percent recorded within the 72-hour limit allowed under HOCR.

Revisions

As mentioned above in relation to Data Accuracy, figures within the current financial year to date are provisional and will be subject to slight revision until finalised figures for the full financial year are published. This means that the totals for each month, crime type and policing district for each month from April 2015 can change each time the figures are published during the financial year.

These revisions will happen for one of a number of reasons:

- Incidents identified as crimes but not processed on the crime recording system by the time the figures are extracted for publication will appear in subsequent updates. For example, a crime is reported to the police on 1st November 2013 and it is fully processed on the crime recording system by 15th November 2013. As figures for the bulletin covering the latest 12 months to 30th November 2013 were extracted and published in December 2013, this crime will be included in the November figures in this publication. However if the same crime is not processed on the crime recording system until 15th January 2014, it will not be available for inclusion in the figures until the data extracted and published towards the end of January 2014.
- Figures may change from month to month due to crimes being reclassified from one crime type to another during the financial year. This may be because quality checks have identified the crime as incorrectly classified, or further information may indicate that the circumstances surrounding the crime were not as initially recorded.
- These revisions are not always in an upwards direction. The Home Office Counting Rules allow crimes initially recorded to be 'no crime'd' or removed from the crime figures. This can happen for a number of reasons:
 - the crime was committed outside the jurisdiction of the police force in which it was recorded;
 - additional verifiable information becomes available which determines that no notifiable crime has been committed;
 - the crime, as alleged, constitutes part of a crime already recorded;
 - the reported incident was recorded as a crime in error.

Full guidance on 'no crimes' is available in the [Home Office Counting Rules](#).

Table 8 Extent of revisions for crime figures contained in the monthly update to 31st July 2015, which was first published 27th August 2015

	Numbers & Percentages					
	As published 27 Aug 2015	As published 24 Sep 2015	Scale of revision		% change between years	
			number	%	As published 27 Aug 2015	As published 24 Sep 2015
Financial Year to date: Apr - Jul 2015	36,249	36,145	-104	-0.3%	2.8%	2.5%
12 Months Aug 2014 to Jul 2015	104,167	104,063	-104	-0.1%	2.2%	2.1%

Introduction of Action Fraud within Northern Ireland: From 1st April 2015 Action Fraud has taken responsibility for the central recording of fraud offences previously recorded by PSNI; Action Fraud became responsible for all such reports in England & Wales by 1st April 2014. Action Fraud is the UK's National Reporting Centre for fraud and internet crime reported directly to them from the public and other organisations. While this means that these fraud offences are no longer recorded by PSNI, Action Fraud figures relating to victims residing in Northern Ireland will be provided to PSNI on a monthly basis. As a result, this bulletin contains a section on 'other fraud' which presents combined PSNI and Action Fraud figures covering the last two years. All other sections within the bulletin present figures on a comparable basis that exclude 'other fraud'.

Additional data

This bulletin shows a Northern Ireland level summary of police recorded crime for the 12 months to August 2015. Accompanying this bulletin are additional data in the form of [summary tables](#) and [pivot table data](#), both of which are available in excel spreadsheets. The data is also available in open data format.

The pivot tables allow the user to manipulate the data, select the data they are most interested in and carry out calculations on the data. The data records displayed in the pivot tables are also available in the same spreadsheet files. The pivot tables provide a range of data including recorded crime, crime outcomes (both numbers and rates) and victim age/gender/population rates; data measures are available for the previous and current rolling 12 months:

- at Northern Ireland level
- for a range of crime types;
- by age range or gender

National Statistics Designation

The United Kingdom Statistics Authority has designated these statistics as National Statistics, in accordance with the Statistics and Registration Service Act 2007 and signifying compliance with the Code of Practice for Official Statistics. Designation can be broadly interpreted to mean that the statistics:

- meet identified user needs;
- are well explained and readily accessible;
- are produced according to sound methods; and
- are managed impartially and objectively in the public interest.

Once statistics have been designated as National Statistics it is a statutory requirement that the Code of Practice shall continue to be observed.

The UK Statistics Authority commenced an assessment of police recorded crime in Northern Ireland in June 2014 and this was concluded after the publication of HMIC's crime data integrity report in March 2015. The Authority's [assessment report Number 301 Statistics on Police Recorded Crime in Northern Ireland \(Police Service of Northern Ireland\)](#) was published on 28th May. This report judged that the police recorded crime statistics in Northern Ireland can be designated as National Statistics (subject to implementing two requirements and reporting on these to the Authority by December 2015).

Geographic availability of police recorded crime statistics

Figures are available for a range of additional geographic areas through the [Northern Ireland Neighbourhood Information System \(NINIS\)](#). These figures are updated on an annual basis.

Provisional management information drawn from police recorded crime figures, published at street level each month, is available through the [police crime mapping website](#). The figures on the crime mapping website will differ from those provided in this bulletin as they have been extracted from the police administrative system on different dates, and also require a grid reference in order to be mapped.

Further information

[Trends in Police Recorded Crime in Northern Ireland 1998/99 to 2014/15](#) was published on 6th August 2015 and provides detailed trend information covering this time period. An updated publication covering trends from 1998/99 to 2014/15 will be available from 6th August 2015, instead of early July 2015 as previously indicated.

Further details on Police Recorded Crime statistics are available in the [User Guide to Police Recorded Crime Statistics in Northern Ireland](#), and in the [Police Recorded Crime Statistics Quality Report](#). These are reference guides with explanatory notes regarding the issues and classifications which are key to the production and presentation of police recorded crime statistics.

Copies of other PSNI publications are available from the PSNI Internet site:

http://www.psnipolice.uk/index/updates/updates_statistics.htm
