Key Statistics

Between 1 April 2022 to 31 March 2023:

- there were 17,742 uses of force reported by PSNI officers, an increase of 3% on the number reported during the previous year (17,306).
- firearms and irritant spray usage increased compared to the previous year while attenuating energy projective (AEPs) and baton usage decreased.
- the most common type of force used was unarmed physical tactics, accounting for 58% of all uses of force.
- the most common reason an officer used force was to protect themselves (86% of the time).
- Belfast District accounted for around one-third of the use of force (34%), followed by Armagh, Banbridge and Craigavon (10%).
- alcohol was the most common perceived impact factor when force was used (63% of the time).

In relation to those persons* on whom force was used:

- 81% were perceived to be male
- 36% were perceived to be between 25 and 34 years old
- 94% were perceived to be white.

**Figures do not represent a unique count of the number of people who were subject to use of force, but rather how many times force was recorded by police officers, disaggregated by gender, age and ethnicity.*

Coverage

Recommendation 21 of the Northern Ireland Policing Board's Human Rights Annual Report (2008) requires the PSNI to, "provide the Policing Board with statistics on all categories of uses of force recorded on the PSNI electronic use of force monitoring system on a six monthly basis." This report outlines the occasions of Police Use of Force for the period 1 April 2022 to 31 March 2023. The next report, covering the 12 month period to September 2023, will be published in December 2023.

Police officers must record the details of any incident where they deployed force tactics through a 'use of force report'. Where an incident involved more than one person or officer, each officer who used force must complete one use of force report, detailing their own use of force. As such, a singular event or individual may feature in multiple use of force reports.

In Sections 2 – 9 of this report, one 'use of force' refers to one officer's use of force involving one or more persons. As such, the number of uses reported is not equal to the number of unique incidents/events or people involved in incidents. If one officer points their firearm at three persons this will be counted as one use of force. If two officers point their firearms at the same three persons during the same incident, two use of force reports should be completed and this will be counted as two uses of force.

Data quality

The figures in Section 10 of this report reflect how many times force was recorded by police officers, however it does not tell us how many individual people experienced police use of force. As explained above, if two officers used force on one individual, each officer would submit a use of force report and the person's details would be reported by both for each type of force used.

In some cases, the person's information e.g. age, gender, ethnicity are recorded as perceived by the reporting officer, therefore should not be considered as reliable as self-reported data. On other occasions, such details are known or reported by the person.

Whilst every effort is made to ensure that all incidents of use of force by the police are reported on the use of force monitoring system, there is the possibility that some under-reporting exists and this should be borne in mind when using these statistics. PSNI are currently working closely with IT colleagues to explore the potential for an automated solution, which could result in increased levels of reporting.

Users and uses of the statistics

Uses of the statistics, based on user engagement, information requests and satisfaction survey feedback include policy making and policy monitoring, performance monitoring and public interest, by a range of users including PSNI, the Policing Board, media and academics. Full details can be found in the [Use of Force User Guide](#).

PSNI Statistics Branch welcomes any user feedback on these statistics, which can be provided via the email address on the cover page.

Official Statistics

This bulletin is an Official Statistics publication meaning it complies with the [Code of Practice for Official Statistics](#). More information on [Official Statistics](#) is available on the PSNI Statistics website.

2. Summary statistics

Notes for sections 2 – 9:

- 1) An officer may have used force on more than one member of the public in a single occasion of using force.
- 2) 'CED drawn' includes drawn, aimed, arced and red-dot.
- 3) 'CED fired' includes drive stun.
- 4) Unarmed physical tactics include blocks/strikes, take downs, pressure points, physical restraint and other/improvised tactics. Each type of tactic used is counted in the figures in these sections; for example, if an officer took down and physically restrained an individual, both of these tactics will be counted.

Table 1 summarises police use of force between 1 April 2022 and 31 March 2023 compared to the same period last year. Further information in relation to each type of force can be found in the [Use of Force User Guide](#).

Direction to draw batons

- A supervisory officer directed officers to draw their batons on a further 7 occasions between 1 April 2022 and 31 March 2023, which are not included in the 'Baton drawn only' statistics in this report. If an officer used his baton as a result of being directed to draw it, this use will be included in the 'baton drawn and used' statistics throughout this report.

Firearms drawn with no persons present

- There were 139 occasions between 1 April 2022 and 31 March 2023 when officers drew their firearms for operational reasons due to a perceived threat when no members of the public were present. This type of force is primarily used by Authorised / Specialist Firearms Officers during methodical and reactive search operations. These occasions are not included in the 'firearms drawn or pointed' statistics in this report.

(1) Guidance notes regarding these statistics have been provided at the start of section 2.

(2) A use of force incident may involve multiple locations (e.g. an incident could begin in a dwelling but finish on the street outside if the person attempted to escape). However, the recording system does not allow for multiple locations to be included for one incident, so the primary location is likely to be recorded.

(3) Locations where force is less frequently used, for example, public buildings, trains and 'other' locations.

10. Gender, age group and ethnicity

The figures in this section do not represent the number of people who were subject to use of force, but rather how many times force was recorded by police officers, disaggregated by gender, age and ethnicity.

More than one use of force report may be completed for the same individual. If two officers used force on one individual, each officer would submit a use of force report and the person's details would be recorded on both reports. Additionally, one officer may have used more than one type of force on the same individual and the person's details would be reported for each type of force used by the officer.

However, the exception to this is in the case of handcuffs / limb restraints and the various types of unarmed physical tactics. If handcuffs and limb restraints are used, or multiple types of unarmed physical tactics are used on an individual by the same officer, the person details will only be counted once.

In some cases, the person's information e.g. age, gender, ethnicity are recorded as perceived by the reporting officer, therefore should not be considered as reliable as self-reported data. On other occasions, such details are known or reported by the person.

11. Background notes

Further information on how these statistics are collated, reported and used is included in the [Use of Force User Guide](#).

Use of force

A use of force is counted as when a police officer uses any of the following force tactics:

- Attenuating Energy Projectile (AEP) - pointed or discharged
- Baton – drawn only or drawn and used
- Irritant spray – drawn only or used
- Firearm – drawn or pointed, or discharged
- Police dog
- Conducted Energy Device (CED) – drawn (including aimed, arced, red-dotted) or fired (including drive-stun)
- Handcuffs / limb restraints (including flexi-cuffs)
- Unarmed physical tactics (including blocks/strikes, take downs, pressure points, physical restraints, other / improvised)
- Spit and bite guard (introduced as a temporary measure at the onset of the COVID-19 pandemic in March 2020)
- Water canon – deployed or used

These are explained in more detail in Section 3 of the [Use of Force User Guide](#).
